

ANGEL C. CAYABYAB

Front-End Developer

Alaminos City, Pangasinan · cayabyabangel6363@gmail.com · +63 966-417-1717

CAREER OBJECTIVE

Information Technology graduate with hands-on project experience and a growing foundation in front-end web development. Seeking an entry-level Front-End Developer role to build clean, user-focused interfaces while continuing to grow through hands-on learning and mentorship.

PROJECTS

WORKEASE — Health & Learning Monitoring App | Capstone Project

- Designed and implemented core features for data recording, reporting, and Parent–CDW (Child Development Worker) collaboration.
- Contributed to a full-stack solution addressing real-world early-childhood monitoring needs.

Don't Press the Button | Android Mobile Application

- Built a reflex-based psychological challenge game featuring dynamic rules, timers, and interactive button mechanics.
- Implemented core game logic in Java, along with custom UI layouts and countdown timers to test player reaction speed and memory.

INTERNSHIP EXPERIENCE

V.O. Domingo Surveying and Printing Services | Alaminos City, Pangasinan

- Digitized client records using the Star System, improving accuracy and efficiency in data management.
- Developed technical documentation processes to streamline and support daily office operations.

SKILLS

Programming Languages: Java, C#, HTML, CSS, PHP, JavaScript

Frameworks & Libraries: React.js, Vue.js, TypeScript, Node.js

Database Management: MySQL — schema design, queries, and data management

Productivity & Design Tools: Microsoft Office (Word, PowerPoint), Google Workspace, Canva, Figma

Core Competencies: Adaptable and collaborative team player with strong verbal and written communication skills
